

QUESTION B2

(a)(i) HAVING A WARM BLOOD.

(ii) HOMO SAPIEN SKELETONS ARE MORE MODERN AND ~~(EVOULDED)~~ EVOLVED HUMAN SKELETONS. THE SKULL OF HOMO SAPIENS ARE MORE ROUND SHAPE AND MORE HUMAN SHAPED COMPARE TO THE SKELETON OF AUSTRALOPITHECUS AFARENSIS.

B

i) We could gather information by using the method of radioactivity which gives us the details of the fossil. "Relative" radioactivity will give us approximate period of time about the fossil whereas "Absolute" radioactivity will give us the exact period of time about the fossil.

ii) we could assess that information was relevant and reliable by confirm with the "Relative" and "absolute" radioactivity. We can also confirm that information collected was relevant and reliable ~~by~~ with use of modern technology, DNA testing we can exactly find out about the fossil with DNA testing which is not very time time consuming as ~~radioactivity~~ procedure.
