

Question 29

- (a) From these articles, identify two responses of plants to temperature change. 2

~~Increase CO₂ concentration~~ plants respond by
activating hundreds of genes and deactivating
others as well as differ their projected flowering
times when cold.

- (b) Evaluate the relevance of the information to your report, and the reliability of each of the sources given. 5

Article 1: is a very reliable source as it has been
recently published and is found on a website
devoted to reporting on current science.

Article 2: is also extremely reliable as it is a scientific
journal and has used 3 people doing first
hand research to gather its results and has
clearly been done over a long period of
time

Article 3: is not very reliable as it is
old and any person with a wikipedia
account can change information on it.
