

Group in Context.

~~By~~ the location of resources can affect employment because if your resources are not from the heart it can affect your employment and might cause stress and emotional disorder ~~and~~ which lead to losing your job or even losing your friends.

one group of the community is aged, this group are very good for the community because they set a good example to the youth and show them what life is about, also the aged group need lots of health around them like, healthcare care, medicare, pension card because all these things are to help stay in the community longer and also supports them. Their financial support is from ^{the} government e.g. centrelink because they ~~go~~ can't go out to the workforce so the government supports them to fit and well.

chronically ill
~~Youth~~ and Disabled.

These two groups both have support from the government because they are not able to do most things people their age will do. Also these two groups are both treated equally by society and are always given support so they don't feel left out or different than others.

Furthermore if you do see someone of these two groups always be there for them if you see them hurt and find ways of supporting even if you don't know what to do.
