

PARENTING AND CARING.

A. Education - Everyone has the rights to education. This contributes to ~~the~~ children's well-being as without it they have no understanding of the world or their rights. Without education as adults they will have difficulties finding a job, if they get into trouble with the law, they have no understanding of their rights. No education would ~~not~~ ~~probably~~ affect the basic of needs as they would have ^{no money} management skills and wouldn't know how to access services for help.

As children education gives them stimulation ^{and} something to work at.

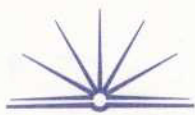

Children with education wellbeing could be affected by other children ridiculing them for not being as smart.

~~SAFETY~~ ^{alone} & SECURITY - Every child has the right to feel safe & secure in their school

as well as their home.

This feeling reassures children adding to their well-being feeling love & safety.

If a child feel safe & secure they will feel better about themselves than a child who is bullied at school and abused at home who will feel lonely and not loved. This child would have a much lower self esteem.

B. Social security provides payments for sole parents to cover basic needs.

They provide cheap travel, medical

They also provide cheap TAFE courses so they can better their skills and try and get a good job to support the family.

C. FOSTER PARENTING.

factors influencing
why the child is

in ~~there~~ their care?

-abused

-sick parent

If the child has been abused the family will have to be very understanding with the way the child acts.

Is it short term
or long term?

Is the kid going to be part of the family or just stay for a few days.
