

a). Financial hardship and transport affect their resource as they are disadvantaged and cannot afford to pay financial bills or transport

b. Homelessness and Aged.

Homelessness are people who do not have any shelter, clothes or food and are unable to provide for themselves as they do not have a job and are unemployed. Although Aged are classified as people over the age of 60 for women and 65 for men. These Aged are provided with financial support through the government and the community. This allows their safety needs and security to be met compared to Homeless the Homeless as they are not supported by the government. Homeless people live without a home and mostly live on the streets with no security of safety needs, they are expected to provide their own needs as However Aged are provided with security and safety needs as the government provides them with nursing homes, or home care if living in their own home.

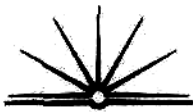

c. Gay and Lesbians

Gay and lesbians have been seen in society as some one who is attracted to the same sex and classifies themselves as gay or lesbians. Society had not and many still do not accept gay and lesbians in

Society as they are seen as not part of our society and has been discriminated against. Through out time the Mardi grab has been a celebration every year for the gay and lesbians who are proud to say they are gay or lesbians. However not only did gay or lesbian people participate but many people who just come to see the festival as a lot of preparation in the exquisite range of colours and sculptures. Through recent years people have begun to except gay and lesbians as part of society and the mighty grab may have had an influence on people attitudes. However some still believe that they should not be accepted in society.

Homelessness has been disrigrated from society many support the homeless such as Support Accomadation Administration program (SAAP) who accomadates homeless people for a short time, churches help by providing food for the homeless. However the government and the community have disrigrated the homeless. Although many do not, the governments disrigrard of the homeless has changed the societal attitudes towards this group as people in communities also disrigrard them. The Salvation Army does provide food, shelter for a short time however many do not find employment as societal find them filthy and do not help them and provide them with needs.

it is extremely hard for the homeless and Gay and lesbians to access resources and society's attitudes to these two groups do not allow them to be accepted or feel any safety or security as they are discriminated against or not even known as important enough.

Governments don't provide these two groups with their needs ~~what~~ and the community do not accept them as who they are. However there are like explained before some people who do provide these two groups with a variety of their needs however they are limited.

~~However~~ For these two groups to change societal attitudes towards them society has to allow these groups to be accepted for who they are or what they look like. ~~is also accept this~~
