

Film - George Lucas, Star Wars - A new hope (Episode 4)

In star wars George Lucas shows change in many ways.

At the beginning princess laya is trying to escape from darth vadlers troops when she records a message for OBI Kenobi with was saved in the memory of R2D2. When princess laya is captured she is taken away by the soldiers while R2D2 escapes inside of an emergency pod.

he lands on a planet where luke skywalker lives when R2D2 ~~was~~ landed it was a change of environment for him. He was ~~in~~ in a dessent and not a warship like he is used to.

As his search continues to find OBI Kenobi, he is captured by Aliens which live on the planet it was certain death for him until Luke skywalker and his Uncle bought him and his friend. They had never had a Robot like him and it was a change for them as they had difficulty

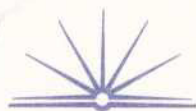

reprogramming R2D2.

Later that morning R2D2 escapes and heads off to find his master OBI Kenobi, Luke jumps on his Racer and goes and looks for him, when he is found he reveals a secret message which the princess had left for OBI Kenobi, It asked for his help as the resistance was in trouble against the darkside.

When OBI Kenobi is found he and Luke return to his cave to discuss the message. OBI Kenobi asks Luke for his help as he is too old for the mission, when Luke refuses and returns home his uncle and Auntie had been murdered Luke was very upset as he had never felt so alone in his life. Luke now has nowhere to live so he accepts the mission to help the resistance fight against the dark side.

This is a big change for Luke as he is a farmer and not a hero who could save the universe.

Luke went through a lot of changes when he trained to be a Jedi knight he learnt to find the force within himself and how to use it to fight evil.

Luke also had to adapt to the cold environment of space as he was now living on a warship. He now was starting to change and be a Jedi knight.

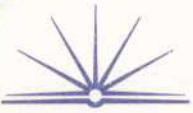

Star Wars is very similar to Feliks Skrzynecki as Feliks was forced to move from Poland to Australia because of a war back in his country.

He also had to adapt to Australian life such as the weather which was much more humid than the cold back in Poland.

He also found it hard to find work as he did not know much English and no employer would give him a chance.

Feliks Skrzynecki is a real life experience which shows every day change, and Star Wars is a

film which was made to have change in it.
