

(Question 4.) English for Study

Good morning guys! Today I'd like to talk about what I learned about study effectively study skills. ~~I learned~~ when I was year 11, I learned least five things to about study skills which research, organisation of information, understanding, note-taking and summarising.

"Research" is the first step for study.

Have you ever heard about phrase "knowledge is the power?" I believe you are hear ~~about~~ this phrase at least once. It suggests collecting information from school library, local library and internet. The collect information of research is the first step for study.

I usually use local library and internet, it has very various information in those.

"Organisation of information" is the second step for study. The organise information divide into some groups author, subject and style. Trying to ^{use} information to you're main point not only the general topic.

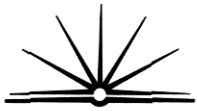

"Understanding" is the third step for study. When you collect information fully, read them carefully, don't read it rapidly. If you are not understanding, better find out another books or ~~whatever~~ you need to you're topic and keep read them again.

"Note-taking" is the ~~fourth~~^{next} step for study. It makes us improve the remembering. When you dealing to someone ~~take~~^{write} ~~report~~^{recorded} name and telephone number, which you in case need ^{to} them again. Here is some good note-taking skills.

- Be clear with the purpose
- Use diagram & picture

~~At~~ Sometime I use mind map, it is an keeping my memories and easy ^{to} look remembering.

"Summarising" is the last step for study.

It is succinct the information as I said ~~at the~~ before. Summarising is the very important to the study skills, don't forget use your memories!

Moreover, ^{also} evaluating is a good step for study skills ~~or~~ ^{like} next Research the topic.

Good luck to ~~a~~ your study!
