Question 17 (7 marks)

- (a) Using Sources A and B, calculate the percentage of Brazil's population living in Sao Paulo in the year 2000. 1

The percentage of Brazil's population living in Sao Paulo in the year 2000 is 165405

- (b) Using Source A, identify TWO features of the population pyramid that make it typical of a mega city in the developing world. 2

In Source A I have noticed that from ages 0-4 has the most percentage and that's because people there are having kids, and also 20-24 less females than males are there.

- (c) Describe ONE health issue and ONE social issue that a mega city in the developing world could face in the next decade. 4

Health issue One health issue that a mega city in the developing world could face in the next decade is ~~not having~~ having more doctors and medicine in the city.

Social issue with the social issues that a mega city in the developing world could face in the next decade is having more jobs for the people
