Marks

Question 18 (5 marks)

Refer to Sources D, E and F.

An environmental impact report must be written before drilling for oil in AR 3593.

- (a) From the sources, identify ONE ecosystem that could be placed at risk as a result of drilling for oil. 1

The nature reserve

- (b) Outline TWO likely impacts that the drilling could have on the ecosystem identified in part (a). 4

If an oil pump began to leak, it would cause harm to the animals and their food.

Not just the animals and their food, but it would affect the status of the island, it wouldn't be the best refugee place for animals and it would make the towns peoples home ugly.
