

### Section III

#### Question 20)

Well with the help of the reference of the Great Barrier Reef is showing how the fishing industries are taking all the fish and know ~~there~~ there have put up a warning that if you are caught fishing in some parts or maybe all the parts of the Great Barrier Reef are protected. Because of some of the fishes that have nearly all been caught - so they've got some of them and spawn them with male or female so there can produce more fish - so then there are even more there so there don't die out.
