## Question 10

Use this information to answer the question. A school assistant maintains a flat-file database to manage vehicle owners who use the school's carpark on a daily basis. The data dictionary contains the following metadata.

The database designer has decided that the flat-file database should be redesigned and split into two tables, a Driver table and a Car table.

Which of the following options provides the best schema for the two new tables? ( $\mathrm{P}=$ primary key, F = foreign key)

| (A) | Driver |
| :---: | :---: |
|  | Driver_Surname (P) |
| A $\times$ | Driver_FirstNames |
|  | Driver_DOB |
|  | Licence_No (F) |

| Car |
| :--- |
| Licence_No $(\mathrm{P})$ |
| Car_Make |
| Car_Manufacture_Year |
| Car_Registration |

| (B) | Driver |
| :---: | :---: |
|  | Driver_Surname |
|  | Driver_FirstNames |
|  | Driver_DOB |
|  | Licence_No (P) |

| Car |
| :--- |
| Car_Make |
| Car_Manufacture_Year |
| Car_Registration (P) |
| Licence_No (F) |

| (C) | Driver |
| :---: | :---: |
|  | Driver_Surname (P) |
| $c \times$ | Driver_FirstNames |
|  | Driver_DOB |
|  | Car_Registration (F) |

| Car_ |
| :--- |
| Car_Registration (P) |
| Car_Make |
| Car_Manufacture_Year |
| Driver_Surname (F) |

| (D) $\times$ Driver |  |
| :--- | :--- |
|  | Driver_Surname (P) |
|  | Driver_FirstNames |
|  | Driver_DOB |
|  | Car_Registration |

| Car |
| :--- |
| Car_Registration (F) |
| Car_Make |
| Car_Manufacture_Year |
| Licence_No |

2010 Information Processes and Technology
HSC Statistics on this Question:

## Band 1/2 Band 2/3 Band 3/4 Band 4/5 Band 5/6

| A 28\% | $36 \%$ | $27 \%$ | $24 \%$ | $18 \%$ |
| :--- | :--- | :--- | :--- | :--- |
| B 23\% | $30 \%$ | $30 \%$ | $44 \%$ | $60 \%$ |
| C 32\% | $18 \%$ | $26 \%$ | $23 \%$ | $18 \%$ |
| D 16\% | $17 \%$ | $17 \%$ | $10 \%$ | $4 \%$ |
| N 1\% | $0 \%$ | $0 \%$ | $0 \%$ | $1 \%$ |

The table and graph show, for the groups of students whose marks in the examination corresponded to the borderline between two bands, what percentages of each group selected the responses $A, B, C$ and $D . N$ is used to identify: No valid response.
