

Start here.

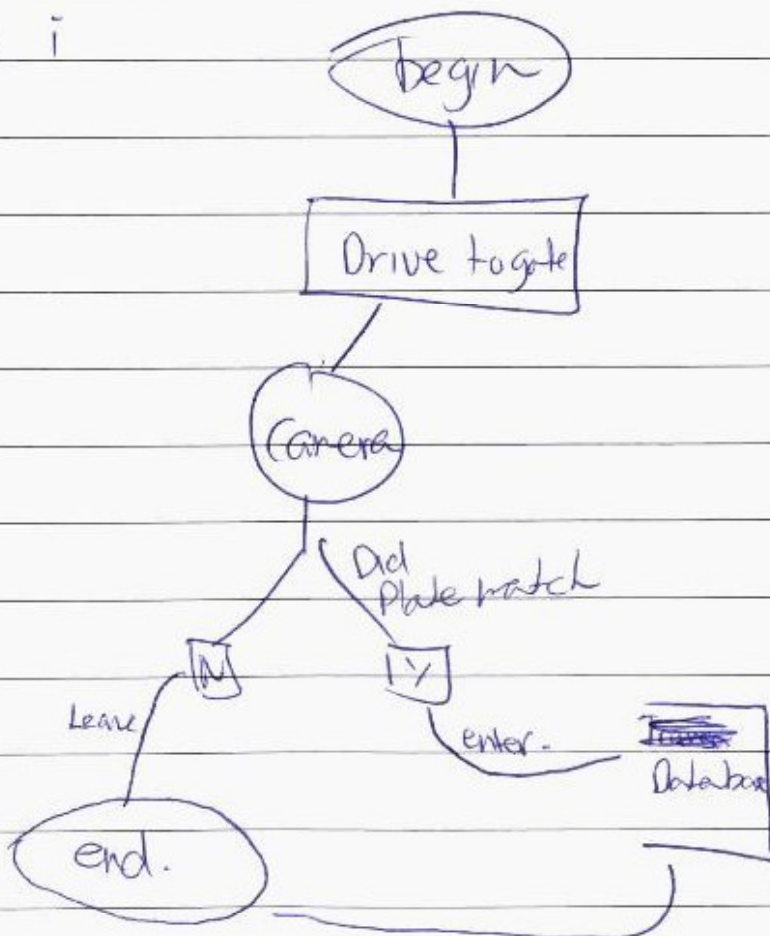

(a) i The id number of the radio frequency.

ii Allows users to see what they have previously withdrawn and identify problems. ie someone stole money from them.

b(i.) ATM - Withdrawn right at that time the transaction is done instantly and awaits confirmation.

(ii) Reduces problems. If machine cuts out it can be done at a later time.

c. i

i Collects number plate:

ii Stores number plate

Retrieves at end of month

~~Sends data~~ Debited from account

iii Bluetooth would be a better option. Camera can be unreliable, most newer cars are installed with bluetooth. It is more reliable.

Additional writing space on back page.
