

(b ii) the role of ~~at~~ Albert Speer in the Nazi war effort from 1941 was that Hitler ~~was~~ ~~no~~ had speer design the weapons for the war and made him minister of armaments.

During the war speer designed a long number of weapons for the soldiers these weapons included

machine guns tanks and a number of other weapons for the war

Speer did not always agree with everything that Hitler wanted in the war but did everything that Hitler expected of him. That is what I think is meant by the statement. ~~that~~ Also that Speer got surrounded by the beliefs of Hitler that he didn't realise the effects of what the war was really having on the German people.
