

Question 21 (continued)

- (b) Discuss how the creation of supportive environments is used to manage the health of Australians.

6

The creation of supportive environments is used to manage the health of Australians by not only creating supportive environments but also healthier ones as well. For example making restaurants no smoking venues, also a non-smoking work place, little things like these create a supportive environment for Australia's population and it also gives people the initiative to get up and go out to dinner or it makes them ~~feel~~ feel more comfortable at work and therefore they enjoy their work and do a better job.
