

Question 21 (continued)

- (b) Discuss how the creation of supportive environments is used to manage the health of Australians.

6

The creation of supportive environment is used to manage the health of Australians. This encourages people to be encouraged to use facilities like dentists, medical centres, chemists. This helps the health rates of Australians to be healthy and prevent illness and to support people to exercise regularly. It is basically making supportive environments so we can improve cure and prevent sickness and disease throughout Australia. Epidemiology studies the illness and disease through a community that is a way of knowing how many people use the ^{available} facilities.
