Improving performance.

I) one benefit to drug testing is it allows athletes to perform against natural skills opposed to enhancers that allows athletes to perform better than they actually can. A limitation could be that athletes cannot use drugs to perform at a higher level and cannot use them safely just for ^{higher performance} ~~improvement~~ reasons.

II) performance enhancing drugs are considered to be unethical in sport as they do not give a true indication of how well a athlete can perform as the drug is not naturally grown in the body.
