

Question 3 (6 marks)

Name ONE theory of social change *work + gender*

With reference to a country you have studied, evaluate how your chosen theory of social change helps you to understand ONE feature of continuity and ONE feature of change within that country.

I have studied JAPAN.
In the work force Japan in the past have been about technology + clothing and the only work that is available is just for men but now it has changed women are now allowed to work but still the Japan is still all about technology and clothing that's why you see nearly every thing you buy eg. Sony it is made in Japan.
Japan starts out at school and stays at school for at least 9 hours a day and the reason for this is that they are to build a better colony. Men + Women in Japan are usually seperated because in the past women weren't allowed to go to school after year 10 when the men were allowed to go on and become the better colony.
Now in the year 2000 women are allowed to go on and become better and smarter to make Japan a great country.
