

**Question 3 (6 marks)**

Name ONE theory of social change ..... ~~The A~~ ~~was~~ functionalist...

With reference to a country you have studied, evaluate how your chosen theory of social change helps you to understand ONE feature of continuity and ONE feature of change within that country.

*through government*

*vote for republic*

The country that explains both continuity and change is Australia. Continuity and change are shown through social theories that include the functionalists, post modernism, and the modernism theory. The social theory of the functionalists contributed to my understanding of the concept continuity because the functionalists believe that ~~everything~~ ~~and in politics~~ everything is inevitable and it occurs because different classes compete for the world's scarce resources for example continuity can be represented in the Australian government because Australia monarchy was continued after a vote for a republic failed in was rejected by our society in 1999. The functionalist theory also believe that change is also inevitable to some cultures or institutions such as gender roles, work roles.
