

Start here.

A) Work; is a job or task performed for either money or simply because the job must be completed. Work is usually the opposite of leisure.

Leisure; is time spent away from 'work' or sleep, ~~leisure~~ is the idea of leisure is that it is relaxing and enjoyable.

Although work and leisure are opposites, sometime they seem to go hand in hand.

~~B) Technology has created a billion dollar industry~~

Leisure is now a billion dollar industry, thanks to technology.

25 years ago, leisure would have included more out door type activities, and family bonding. ie; camping in a tent with no electricite, ~~or~~ no mobile phones etc. Today camp may include, motor homes, televisions, laptops etc.

Going to the movies, watching HD television, wireless internet and telephones.

We are living in the technology age and there's not many ~~at~~ ^{leisure}

- 2 -

activity one can undertake without coming across some new and improved form of technology.

Also the impact of technology, has allowed for leisure time to happen at any given moment, in which technology is available. ie; at work; playing games, checking emails, using Facebook via the internet; by most people these activities can be seen as leisure.

~~Leisure is constantly changing, and technology is contributing to these changes and improvements.~~

Also the fitness ^{and beauty} component of leisure is booming, due to technology, by providing the public with a large, better selection of clothing, accessories, health foods, machines, etc.

The consumers buy the products, as they think they need them in order to get healthy and beautiful, so they can enjoy their leisure time.

Additional writing space on back page.

These ideas and concepts are due to technologies contribution to the pattern of leisure, and these patterns are growing, changing and improving because of ~~leisure~~ technology.

You may ask for an extra Writing Booklet if you need more space.
