c) Technology will impact on the nature on work and leisure in the future as it has in the past. The Industrial Revolution in the past impacted on the kinds of jobs that were available to labourers. The mechanisation of industries resulted in many jobs that used to be carried out by humans to be replaced by machines for efficiency and to maximise profits. This resulted in many loss of jobs and the loss of need for some industries (i.e. linograph typer in printing services replaced by printers). Technology replacing jobs can affect the newly unemployed sense of identity. For some people that are used to defining themselves as their jobs/careers, they can feel a strong sense of alienation or loss of identity if they lose their jobs. Thus, ~~the~~ technology ~~can~~ impacting on work and leisure may also affect individuals in the society. This may also occur in the future

~~Technology can~~

While technology can diminish the need for human labour, it can also create new jobs. The entire I.T. industry has evolved as a result of technology impacting

on the nature of work and leisure. In the future, similar trends may show as more jobs are replaced or created because of technology. The context and the current demands of the time will also influence how technology is used in work and leisure.

Technology can create more jobs and leisure activities. Through technological advancements work and leisure may be ~~or~~ reshaped in ~~the~~ developed in the future. For example, medicinal or surgical technological advancements may create demand for new jobs for people that can operate such equipment. Furthermore, new gadgets and inventions for leisure may ~~also~~ create a new leisure industry - creating business(work) but also affecting ~~leisure~~ contemporary leisure.

Technology has allowed for the rise in people working at home. The increasing abundance of technology as well as the need for it in a media/communications world ~~creates~~ creates more demand thus adding to the

Additional writing space on back page.

impact of technology that could continue to impact in the future.

As technology expands and the ease of communication rises, the world essentially becomes more interrelated/integrated.

This may also affect work and leisure in the future as people have more access ~~to~~ and awareness of types of work and leisure in other parts of the world.

Technology creates a more globalised world.

Technology could also affect time in the future as work operations using technology become either slower or speedier.

The growth of e-commerce ~~is~~ impacts on the way work and leisure is formed.
