

Q21,

(i) Begin Display Train
Read number of train

$$\text{Train} = 3$$

While \leq Number of train (10)

Read Location (Train, Location 2, Location 8)

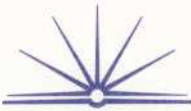

Display Train ID, (Train ID), Location 2, Location 8

$$\text{Train} = \text{Train} + 1$$

(ii) Does not work due to having more than three trains, algorithm does not accommodate for 1 + trains with 10 car location.

(iii) NO IDEA!

(b) Plagiarism, Breach of copy weight, Author can't claim intellectual property.

(ii) Claim Intellectual property, ~~reliable~~
Reliably, Respond to problem, prevent
the spread of virus, Use case tools to
assist in development.
