

## Question 23

a) i) ENDIF after the "SystemStatus = 'OFF'"  
The <sup>sub.</sup> program is already finished running

ii) Delete the ENDIF on line 14.

iii) Text, number, boolean.

iv) Line 19

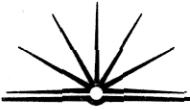

line 29

b)

c) Paper documentation could include screenshots of what needs to be done and how to do it.

Video documentation could show the user exactly what to do and how to do it.

Paper documentation would be more suitable as the user could easily

look at the index and go straight to the information they are looking for. They could also look at the screenshots of the program and see exactly what needs to be done.
