

## Question 2

'Technological advances have transformed the practices of artists.'

Artists have always tried to find new or ~~more~~ more refined technologies or materials to use to make a work of art. For example a sculptor may try to manipulate ~~in~~ wax after ~~the~~ manipulating steel just to see which material he or her skills lie in.

Technological advances have made many new artists, artworks and fields. For example cameras, canvas, film, tv, computer animation, computer imaging, etc. . . . . All have made artists for our modern world. Making the ~~previously~~ previously thought impossible, possible.

Advances in Art have been made by ~~many~~ made by many artists, not just in technology advancement but also in ~~style~~ style, technique and abstract ideas.

As for the statement 'Technological advances has transformed the practices of artists.' I think it is up to the artists if he/she chooses to employ modern technology into their work or rely on more basic or historical practices.
