

Question 2

Technological advances have changed the practices of artists.

Gone are the days when the only art that could be created was with a paint brush and canvas or lumps of clay.

Due to advances in technology artists have access to all kinds of useful resources. cameras, computers, modelling products (such as plaster and mod rock) etc. To create more art.

Hundreds of years ago people carved wood and marble to make sculptures. This was hard work and

incredibly tedious. They also began using clay from the earth which was pliable and easy to work with. Today there is an amazing range of things they can use to sculpt, metals, plastics, paper mache, wood, rock, plastecine the list goes on and on as time past artist became more and more innovative.

centuries ago to record events people relied on artists to record events, this took time and an intense eye and talent for detail

But then with the advances in technology ~~the~~ artists have use to photography which not only can be used to

record events but also with clever tricks and dark room skills photographs can be turned into breathtaking pieces of art that are more detailed and life like than a painting could ever be.

There are now ^{video} cameras which can record motion and ^{digital} cameras which can plug into the computer to store images.

Computers have also become adapted into the art world. There are many artists who use computers to create their works.

Technological advances have changed the practices of artists for centuries and

Things will keep progressing
and changing for many
centuries to come.
