

I begin, conscript fathers, me being lenient,
I begin to see that in such states, the
dangers ~~to~~ have not been solved, but now I
condemn those by inertia and, . The
camps in Italy are against the
people of Rome having been gathered to the in
Etruria, in a few days the number of the
enemy grows, ^{but} ~~for~~ of those camps ~~the emperor~~
the chief ~~and~~ leader ^{and} the enemy amongst city
walls and I am present ~~in the senate~~ you
see ~~son~~ within the senate something pernicious

everyday destroying the state.

b) As if from such theft that one is bringing, we will have seen perhaps in a short time by care and by fear having been relieved. But I will reside the danger ^{and it} will have been closed in hit in the veins and into the ^{by} the state. So often men ~~become~~ sick ~~with~~ ^{by} a serious illness and with fever and ~~vomiting~~ lying down by summer, they had drunk water like ice, at first it seem to be relieved, then the illness

became more serious and they are being
afflicted, by thus that illness, which is in
the state, having been relieved by that punishment,
~~seriously~~ left ~~the living~~ left them serious
~~the living~~
and ~~he~~ grew more serious, ~~in the living~~

they are separated from, they are gathering
~~the good~~
together in the one place, finally by the wall,
because often now I have said ^{they} are being discerned by

us.
