

Start here.

(b)

noise, after a certain db (decibel), ~~car alarms~~  
~~the~~ car alarms can start to go off, wake  
people up in middle of night. Your car could  
shake itself to pieces. You could end up with  
no ear drums left.

air quality, the air quality has to be good  
enough to work in. Some air conditioner would  
be good to just circulate the air, keep it fresh.

Trade waste water - they put there waste water into a container. They then wait for the authorised collector to come and get it. He then does what he does.

All this happens because it is not allowed to go into the drains. or it would be contamination and the workshop would be fined by the council for polluting waterways.

Additional writing space on back page.
