

Start here.

b) In an Automotive business you will get a lot of waste matter such as waste water and ~~general~~ general materials and also make a lot of noise.

most automotive places will have big Scrap Bins ^{for} ~~and~~ Scrap metal they also so have other large bins that would be used for ~~most~~ most other Scrap thing and ~~it~~ it would be picked up and taken to the dump.

water gets used a lot from washing things off to filling things up most of it is OK to go down the storm water Drain except for the stuff with ~~oil~~ oil or chemicals in it. ~~to~~ It is stored in barrels and disposed in correct bin.

noise pollution is a big thing it is usually reduced by Automotive work shops being built in ~~an~~ industrial area where it is open and doesn't affect many

people. It can also be helped by ~~but~~ plant
tree hedges that help reduce noise for
your neighbours.
